

## Now Available

VisualDx can be accessed from your institution's Intranet, library e-resources page, or by logging in at [www.visualdx.com](http://www.visualdx.com).

### What is VisualDx?

VisualDx is an electronic resource for desktop and mobile devices that combines the power of a comprehensive medical image library with concise specialist-developed clinical information.

- Access more than 20,000 medical images detailing variation in age, stage, and skin type.
- Review over 1,000 visually presenting conditions.
- Expand clinical knowledge on specialty and underrepresented areas of medicine such as dermatology and infectious disease.

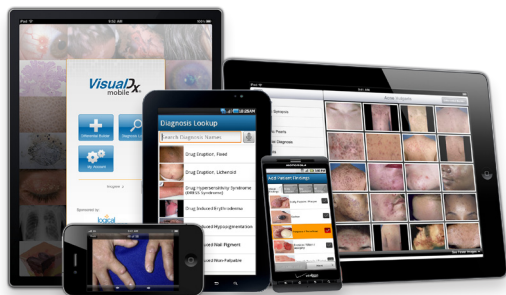

### How to Use VisualDx:

When you enter VisualDx, the home page provides two options for ease of use. Quickly search by diagnosis using the *Look Up a Diagnosis* search box, or click the *Differential Builder* to start developing a visual differential diagnosis based on patient findings.

In just seconds, VisualDx lets you:

- Visually validate a patient's diagnosis.
- Quickly access next steps for management and care.
- Develop a patient-relevant differential diagnosis.
- Provide patient education with real images they can relate to.

Four steps to a more accurate diagnosis.  
How to build a patient-relevant differential diagnosis with VisualDx:

### 1 Start by choosing a clinical scenario.

### 2 Build a patient-relevant differential.

### 3 See the differential.

### 4 Get informed to conclude diagnosis.
