Nearly every person will experience a diagnostic error in their lifetime.  

Generalists receive an average of 21 HOURS of training in dermatology, making it difficult to accurately diagnose skin conditions and their corresponding illnesses.¹

Over 65% of skin conditions are seen by non-dermatologists²

48% of non-dermatologists misdiagnose skin conditions³

15% of all doctor visits include a skin related complaint²

50% use VisualDx on a mobile device

VISUALDX PHYSICIANS

80% use Apple iPhone or iPad

20% use Android

CORE ML PROTECTS PRIVACY. Photo is only stored in physician’s phone memory. VisualDx never receives it.

Distributed core processing saves money, improves speed and accuracy of diagnosis.

“Nearly every person will experience a diagnostic error in their lifetime.”
